MEMORANDUM

To: Knoxville-Knox County Planning Commission
From: Amy Brooks, AICP, Planning Services Manager
Date: 3/04/2020
Subject: 3-A-20-OYP: Consideration of amendments to the Knoxville One Year Plan 2020 Update

STAFF RECOMMENDATION:
Knoxville-Knox County Planning staff recommend approval of the 2020 One Year Plan.

BACKGROUND

Article VIII, Section 801 of the City Charter requires future zoning in the city conform to the City’s comprehensive development plans. The Charter requires the annual preparation and adoption of a one-year comprehensive development plan covering the entire city. Fifteen-and five-year development plans (sector plans) are prepared to provide policy guidance on long and mid-range development issues and serve as a guide to development of the One Year Plan. The One Year Plan (OYP) is specifically designed to be the foundation for land use regulations and short-term public improvements and is used as the basis for rezoning decisions within the City of Knoxville. Pursuant to the requirements of the City Charter, staff has completed the 2020 annual update of the OYP.

2020 PLAN UPDATE HIGHLIGHTS

Planning staff utilized a variety of resources to solicit community input including online news article, a press release, social media, and a project update page that included interactive mapping. The interactive map series includes the following:

- The current OYP
• OYP and sector plan conflicts
• OYP staff amendments
• Recent OYP amendments
• OYP and zoning conflicts

Three community meetings were held and attended by 35 community members. The meetings were held in three distinct geographic locations throughout the City.

- South Doyle Middle School Library, 3900 Decatur Drive, 37920
- Deane Hill Recreation Center, 7400 Deane Hill Drive, 37919
- Washington Pike United Methodist Church, 2241 Washington Pike, 37917

The purpose of these meetings was to share information about the proposed amendments, share the plan update objectives, and gather input from the community. The 2020 objectives for the OYP included:

• Improve consistency between the OYP and sector plans
• Reduce redundancies between the OYP and sector plans
• Communicate conflicts through online mapping

Proposed Amendments
The proposed amendments to the 2020 OYP update include 14 staff amendments and the incorporation of 12 amendments approved by City Council since the 2019 update. See Attachment 1 for a list of proposed amendments.

Proposed Revisions to the One Year Plan Document
One of the goals this year was to improve consistency and remove redundancies that occur between the OYP and the sector plans. By improving consistency and reducing redundancies staff hopes to achieve a OYP that is more user friendly to both the community and decision makers and easier to update and maintain.

To accomplish this goal some information was removed because it is included elsewhere. Additionally, language was fine-tuned throughout the document to add clarity, and brevity when appropriate. In some
instances, the zoning ordinance may use different terminology than OYP to denote the same use (ex., group quarters versus group homes). In these instances, the OYP plan was edited to make the language consistent with the zoning ordinance. See Attachment 2 for a summary of the proposed revisions.

Next Steps
If approved by the Knoxville-Knox County Planning Commission, the plan will be forwarded to Knoxville City Council for consideration on April 7, 2020 and April 21, 2020.

Attachment 2: List of Proposed Revisions to the 2020 One Year Plan

The following is a list of proposed edits for the 2020 One Year Plan (OYP). One of the goals this year is to remove redundancies that occur between this plan and the sector plans. To accomplish this, some information has been removed.

Additionally, language was fine-tuned throughout the document to add clarity, and brevity when appropriate. In some instances, the zoning ordinance may use different terminology than OYP to denote the same use (e.g., group quarters versus group homes). In these instances, the OYP plan was edited to make the language consistent with the zoning ordinance. The summary below does not include these types of minor changes but does list the largest revisions proposed.

Chapter 1

1. The sentence summarizing the One Year Plan was revised to clarify what it is and reflect how it is used by planning staff. The previous sentence called the OYP a land use and zoning plan. The OYP is not technically a zoning plan. The zoning was provided in a list in the Appendix section. The OYP and sector plans provide a lot of the same information, but the sector plans delve deeper into local issues within each sector and as such are used more frequently by staff in researching land use and zoning in an area.

2. The “One Year Plan Formulation” section in previous versions of the plan listed the Growth Policy Plan, the General Plan, and the sector plans as plans used in formulating the OYP plan. The OYP Formulation header was removed and the information on the Growth Policy Plan and the General Plan was replaced with a graphic showing the relationship between the different types of plans. The graphic comes after the “Sector Plans” and the “Effect On Zoning” sections and is part of the “Plan Updates” section.

3. The sector plan description (p. 2) was expanded briefly to provide more context into the difference between sector plans and the OYP.

4. Highlighted language at the top of page 4 was revised to add clarity and more accurately reflect how planning staff uses the OYP.

5. Language in the “Effect on Existing Zoning” section (p. 4) was edited to reflect how the OYP plan is one of many various plans, tables, and resources planning staff consider when making zoning recommendations. In saying the OYP is the basis for all zoning within the City, emphasis is put on the OYP that makes it appear to be the only, or even the main, instrument that is utilized, when that is not necessarily the case.

6. Language regarding “general rezonings” was also deleted from the Effect on Existing Zoning section (previous plan, p. 6). General rezonings are no longer used to the extent they were in the past. This section in the OYP described how general zonings would be undertaken but does not give the City authority to do these, as that is given under state law (TCA § 13-7-201 and § 13-7-202). Since staff has no general rezonings planned for 2020, this section was deleted from the plan.

7. As stated in item 2 above, a flow chart showing the various plans for the City and Knox County was inserted into the “Plan Updates” section to add clarity to how the OYP fits within all plans.

8. Also in the “Plan Amendment” section, the list of steps to pursue a plan amendment was converted to a flow chart. The information was condensed to give an overview of the process
versus giving the minutiae of these requests to break it down into a more easily understandable format.

9. “Types of Amendments Proposed” header was changed to “Acceptable Reasons for Amendments During Annual Updates” to more accurately describe the information contained within that section.

10. A section regarding the new zoning ordinance was added.

Previous Chapter 2

As stated earlier, one of the goals this year was to remove redundancies that occur between this plan and the sector plans. Most of these redundancies occur in Chapter 2 with regard to the Land Use Classification Table recently adopted by City Council. This table occurred in all sector plans and in the OYP, and when a table was revised in one of these plans, it fell out of sync with the tables in the other plans until those plans were updated. This resulted in the location criteria, descriptions, and allowed zoning in different land use categories within the numerous tables becoming inconsistent with each other. By moving the Land Use Classification Table to Appendix B, staff can more easily ensure that it stays current. The sector plans will refer to the Land Use Classification Table located in Appendix B of the OYP and made available as a stand-alone document on Planning’s website for easy reference.

Chapter 2 featured an abbreviated version of the Land Use Table, containing the land use name, a brief description, and the zones allowed in each land use. Since that information was redundant, this chapter was deleted.

Previous Chapter 3

Chapter 3 contains more detailed descriptions of each land use category. These descriptions include the intent of and the location criteria for each land use category. Location criteria is also provided for several specific uses within some of the overarching land use categories (ex. duplexes, hospitals, etc.). The specific use criteria has been pulled from the land use categories to create more consistency within their formatting, and moved to a subsection to make them easier to find. The Technology Park (TP), Hillside and Ridgetop Protection (HP), and Stream Protection (SP) classes were added to this document to make it consistent with the Land Use Classification Table.

Previous Chapter 4

1. Proposed Land Use maps are featured on the website but are not included in the document as they are too small to be useful in looking at properties.

Previous Chapter 5 / Current Chapter 2

1. The title of the Chapter was revised to be clear that the amendments included are staff-proposed and not applicant proposed. Applicant-proposed amendments, which were approved in 2019, are in the Appendix.

2. Staff-Proposed Amendments are now in a table format followed by a brief general explanation of why these types of amendments are needed.
Previous Chapter 6 / Current Chapter 3

1. The title of the chapter was revised to include the verbiage, "Identified Conflicts" to add clarity to the information contained within the chapter. There were no general rezonings proposed. The maps included identify various conflicts between the sector plan maps and the OYP map.

Appendix B

The previous Appendix B contained more detailed descriptions of each zoning district. This information is covered in the newly updated City of Knoxville Zoning Ordinance and the Land Use Classifications Table.

CHAPTER 1
INTRODUCTION

On November 2, 1982, Knoxville voters approved by referendum a revision of the City Charter which strengthened the relationship between planning and zoning.

The Charter—Article VIII, Section 801—requires that future zoning in the city conform to the community’s comprehensive development plans. Previously, plans were guides for zoning, but conformance to the plans was not legally required.

The Charter requires the annual preparation and adoption of a one-year comprehensive development plan covering the entire city. Fifteen- and five-year development plans (sector plans) are prepared to provide policy guidance on long and mid-range development issues and as a guide to development of the One Year Plan. The One Year Plan is specifically designed to be the basis for land use regulations and short-term public improvements.

ONE YEAR DEVELOPMENT PLAN

The One Year Plan is a tool to align the sector plans with the City’s zoning.

The Charter states [Article VIII, Section 801 (A)]:

“The mayor shall have the Metropolitan Planning Commission (now the Knoxville-Knox County Planning Commission) prepare a one-year development plan which delineates the city’s proposed land use development pattern for the succeeding twelve-month period and is based upon the development goals and objectives specified in the city’s five-year development plan. The one-year development plan shall provide the basis for zoning of all properties within the city limits.”
This text and the accompanying maps comprise the One Year Plan required by the Charter. The land use and zoning plan cover all of Knoxville; however, for the sake of convenience, each plan has been divided into six districts roughly corresponding to the six city planning sectors. The One Year Plan maps illustrate the city’s proposed land use pattern by designating property into one of thirty-one land use classes. The text describes the intent of each class. In addition, the text identifies an appropriate range of zoning districts within the city’s zoning ordinance which would be in conformance to the plan.

The One Year Plan, by law and practice, is developed with a high level of community involvement. The required updates keep the plan a current and accurate guide for community growth, preservation, and enhancement. The structured amendment process allows the entire community to participate in the consideration of changes to the plan and provides more complete information on which to base decisions.

**SECTOR PLANS**

Sector plans are a series of plans which provide policies and recommendations on land use, transportation, and public facilities for the twelve geographic sectors of Knoxville and Knox County, for planning periods of five and fifteen years. The sector plans are elements of the General Plan. Many of them incorporate small area plans and/or corridor plans – the results of study by planning staff. Sectors are not divided along city-county boundary lines, so there are small pockets of land that are incorporated into the City of Knoxville but are in a County sector.
The following sector plans were used in preparing the One Year Plan:

- Central City Sector, adopted by City Council - 9/30/14
- East City Sector, adopted by City Council - 5/27/14
- North City Sector, adopted by City Council - 7/17/07
- Northwest City Sector, adopted by City Council - 5/26/15
- South City Sector, adopted by City Council - 10/18/11
- West City Sector, adopted by City Council - 9/11/07
- East County Sector, adopted by City Council - 6/15/10
- North County Sector, adopted by City Council - 9/4/12
- Northeast County Sector, adopted by City Council - 1/19/16
- Northwest County Sector, adopted by City Council - 8/30/16
- South County Sector, adopted by City Council - 11/28/12
- Southwest County Sector, adopted by City Council - 10/25/16
The One Year Plan implements the listed long-range plans in an evolutionary manner. It balances the goals and objectives of long-range plans against the realities of existing land uses and zoning.

In some cases, planning staff makes recommendations to revise the One Year Plan map boundaries for each land use class as sector plan maps are amended.

**EFFECT ON EXISTING ZONING**

Staff utilizes the One Year Plan as a tool when reviewing rezoning and sector plan amendment applications. Future zoning changes must conform to the plan or meet the criteria for an amendment. In addition, the plan may propose amendments to the zoning ordinance text and zoning map to bring them into conformance.

**PLAN UPDATES**

The Charter specifies that the sector and One Year plans be updated and re-adopted. New conditions and changing community goals will gradually change the community’s desired land use pattern. The process for plan updates progresses from the General Plan and sector plans to the One Year Plan. Through this process, citizens can see how long-range policies and goals relate to the specific recommendations of the One Year Plan.
Knoxville-Knox County Relationship of Adopted Plans

- **20-Year Growth Plan**: Establishes policies and boundaries for growth and development.
- **30-Year General Plan**: Establishes policies, principals and concepts to guide future development.
- **Sector Plans**: 15-year land use and 5-year implementation plan divided into 12 geographic sectors.
- **1-Year Zoning Plan & Guide**: Tool to bring zoning into alignment with Sector Plans.
  *Can only be amended quarterly.

**Corridor Plans**  **Small Area Plans**  **Parks & Facilities Plans**  **Special Studies**
PLAN AMENDMENTS

The Charter states [Article VIII, Section B (2)]:

“Amendments to a Comprehensive Development Plan may be made at any time during the year following the submission to and action thereon by the Metropolitan Planning Commission (now the Knoxville-Knox County Planning Commission). These amendments shall become effective when adopted by a majority vote of the membership of Council.”

Due to the short-term nature of the One Year Plan and the widespread community involvement in its preparation, the need for plan amendments should be rare. The annual update is, in fact, the built-in mechanism best suited for amending the plan. Amendments to the plan between updates should be kept to a minimum and warranted only under the following circumstances, which form the basis for planning staff review:

1. An error in the plan.

2. A significant change in the development pattern, or the completion of a public improvement (road, park, sewer), which changes the basis on which the plan was developed for an area.

3. A change in public policy, unanticipated by the plan.

4. New information (including new plans and studies produced by Knoxville-Knox County Planning) becoming available, which reveals the need for a plan amendment.

Plan amendment studies will be conducted when authorized by either the Planning Commission or City Council. Individual requests for plan amendments may be made by filing a One Year Plan amendment request and paying the appropriate fees at the Knoxville-Knox County Planning office. Applications for One Year Plan amendment requests will be heard at the Planning Commission’s April, July, October, and January monthly meetings. Postponements may be heard at the next regularly scheduled meeting. Planning staff will conduct a study of the area and the land use issues involved.
Plan Amendment Process

**One Year Plan** - Amendments are only considered at January, April, July, and October Planning Commission meetings.

APPLICATION
Submit 45 days before Planning Commission Meeting, or pay an additional fee to extend the deadline up to 5 days

PLANNING STAFF REPORT
Staff report and recommendation prepared and posted on Planning website 6 days before Planning Commission Meeting

PLANNING COMMISSION MEETING*
Commission votes on recommended action

APPROVE**

CITY COUNCIL MEETING

APPROVE**
Requires 2 readings; rezoning effective 17 days after second reading

DENY

STOP
Cannot reapply for 1 year

APPEAL TO COURT

DENY

STOP
Cannot reapply for 1 year

APPEAL
City Council (within 15 days)

*In addition to approving or denying a case, the Planning Commission may also choose to postpone, table or withdraw it.

**Whether the case is approved, approved with conditions, or denied, the applicant or any other resident interested in the case may appeal the decision to City Council or court.
Amended proposals for plan amendments or general rezonings will not be acted upon at the final adoption stage of the process: Amended proposals will be postponed until adequate public notice is posted and the staff has had time to review the proposal and develop a recommendation.

This policy does not preclude the Planning Commission or City Council from altering any plan amendment or general rezoning recommended by the staff as part of a One Year Plan update being considered for adoption.

Right of appeal of the Planning Commission’s action: Any person who feels grieved by the action of the Commissions regarding a request for a plan amendment study has the right to file an appeal within fifteen days after action. This appeal will be heard by City Council.

Denial of a request for a plan amendment study or denial of a plan amendment study: A new application for the same proposal shall not be accepted for a period of one year after the date of denial of such a proposal. However, where denial is appealed and the proposal is referred back to the Commission by the City Council with a request for further study, such proposal may be reconsidered. During the annual update process, requests for plan amendment studies from the previous twelve months may be reconsidered. If a Planning Commission approval is overturned by the legislative body, the one-year rule shall apply.

ACCEPTABLE REASONS FOR AMENDMENTS DURING ANNUAL UPDATES

Acceptable reasons for amendments during annual updates fall into five criteria. These measures were established to provide a comprehensive approach to the process and are based on the warranted circumstances listed above. The five criteria represent changes intended:

1. To match existing development and zoning and which are compatible with the character of the surrounding area;
2. To accommodate appropriate, compatible mixed use and transition areas;
3. To implement the land use pattern envisioned in the sector plans;
4. To deal with miscellaneous situations, including: (a) recognition of historic properties; (b) public property; (c) errors which have been identified; and (d) annexed properties; and
5. To accommodate changes to the Knoxville Zoning Ordinance.
NEW ZONING ORDINANCE EFFECTIVE JANUARY 1, 2020

In early 2017, the City of Knoxville and Knoxville-Knox County Planning began overhauling the City’s zoning ordinance for the first time in more than 50 years.

The process, known as Recode Knoxville, continued for more than two years as planners, city staff, and consultants worked to create an ordinance that supports investment, protects our single-family neighborhoods, and connects our community.

Along the way, there were more than 90 public meetings, as well as Planning Commission and City Council meetings and workshops. Efforts were made to include as many people as possible in the process. Planning staff worked with community partners – the Knoxville Area Urban League, Centro Hispano de East Tennessee, and SEEED (Socially Equal Energy Efficient Development) – to better reach and engage underrepresented communities. Other outreach efforts included online surveys, information placed in KUB (Knoxville Utility Board) bills, sending a notification letter to every property owner, testing the proposed ordinance with a group of design professionals, and participating in a public forum.

The ordinance went through five drafts and the map went through four before City Council passed it. Those drafts represent amendments made along the way based on substantial public input and critical review. The final ordinance went into effect of January 1, 2020, and a City of Knoxville Zoning Ordinance Stakeholder Advisory Committee continues to meet to provide feedback, ensuring that the ordinance serves the diverse interests of the City.
CHAPTER 2
DEVELOPMENT POLICY

A major purpose of the One Year Plan is defining the city’s land use pattern for a twelve-month period following the plan’s adoption. This section states the intent, policies, and zoning districts which should be used within each of the land use categories.

AGRICULTURAL AND RURAL CLASSIFICATIONS

Provide areas for agricultural uses through preserving lands best suited for agricultural purposes, while minimizing the adverse impact on adjacent lands.

AGRICULTURAL (AG)

Areas designated for agricultural uses will generally consist of undeveloped tracts with the best soils for agriculture.

A. Residential uses may be permitted at densities not to exceed one dwelling unit per acre of land.

B. Areas should be zoned AG, which allows single family dwelling uses only with a minimum lot size of 5 acres, or OS, which does not allow residential uses.

C. Multiple-dwelling structures are not permitted.

AGRICULTURAL CONSERVATION (AGC)

Areas designated for agricultural uses will generally consist of undeveloped tracts with the best soils for agriculture, plus have a long-term conservancy agreement on the property.

A. Residential uses may be permitted at densities not to exceed one dwelling unit per acre of land.
B. Areas should be AG, which allows single family dwelling uses only with a minimum lot size of 5 acres, or OS, which does not allow residential uses, as appropriate and provided for under the Knoxville Zoning Ordinance.

C. Multiple-dwelling structures are not permitted.

RURAL RESIDENTIAL (RR)
Areas designated for rural residential uses should be reserved for very low density residential and conservation/cluster housing subdivisions.

A. Residential uses may be permitted at densities not to exceed one dwelling unit per acre of land.

B. Areas should be zoned AG, which allows single family dwelling uses only with a minimum lot size of 5 acres, or OS, which does not allow residential uses, as appropriate and provided for under the Knoxville Zoning Ordinance.

C. Multiple-dwelling structures are not permitted.

RESIDENTIAL CLASSIFICATIONS
The intent of this classification is to provide all persons the opportunity to reside in decent, safe, and sanitary housing in a suitable living environment; provide a variety of housing types; and locate housing densities based on service availability, proximity to activity areas, access, and natural limitations of the land.

LOW DENSITY RESIDENTIAL (LDR)
This development is primarily residential in character at a density of less than 6 dwelling units per acre. This type of residential development includes detached residences, duplexes, and low density planned residential uses.

A. Development should be located where services can be provided and where it will not be impacted by more intense development or through-traffic.
B. The primary residential pattern should be neighborhoods.

1. The main neighborhood form should be detached residential development that is of sufficient size and design to promote neighborhood formation and land use stability.
   a. Detached housing developments should be protected from through-traffic and buffered from incompatible land uses.
   b. Detached housing developments should not have direct access to major collectors or arterials.

C. Areas should be zoned AG, RN-1, EN, RN-2, or RN-3, as appropriate and provided for under the Knoxville Zoning Ordinance.

**MEDIUM DENSITY RESIDENTIAL (MDR)**

This development is defined as primarily residential in character having a density from 6-24 dwelling units per acre. Major land uses within this class include duplexes and attached multi-dwelling development.

A. Locate medium density residential development within the Urban Area on collector and arterial roads. Provision of on-site recreation and open space should be required. A variety of terrain is suitable, but, generally, the grade should not exceed 15%. The location should be convenient to shopping.

   1. Locate the highest concentrations of medium density housing within or near the inner city.

   2. Medium Density housing should also be encouraged within development corridors and near development centers.

   3. Permit the reuse of detached houses for attached multi-dwelling residential uses only where the structure is on a collector or arterial street, does not negatively impact adjacent property, and adequate community facilities are available.

B. Planned residential development is encouraged where sites possess unusual features (e.g., size, shape, topography, adjacent land use) that present special development opportunities or limitations.
C. Commercial sales areas in conjunction with medium density housing should be clearly separated from the residential portion of the development and should be in conformance with commercial locational policies.

1. Medium density housing may be used in some instances as buffers between detached housing areas and more intense non-residential uses.

D. Areas should be zoned RN-2, RN-3, RN-4, or RN-5.

**HIGH DENSITY RESIDENTIAL (HDR)**

This development is defined as primarily residential in character having a density greater than 24 dwelling units per acre. Primary land uses included in this class are medium- and high-rise attached multi-dwelling development.

A. Locate high density development on major collectors and arterials adjacent to employment centers and major retail shopping districts. There should be an emphasis on aesthetics, open space, and recreation in planning such developments. Locations should be convenient to interstate highways, central business district, or other major activity centers.

B. Areas should be zoned RN-5, RN-6, RN-7, or DK as appropriate and provided for under the Knoxville Zoning Ordinance.

**TRADITIONAL NEIGHBORHOOD RESIDENTIAL (TDR)**

This development is primarily residential and is characterized by neighborhoods with a mix of detached and attached houses, sidewalks, smaller lots and alleys. Densities in the range of 4 to 8 dwelling units per acre are typical.

A. Neighborhoods where lots are typically less than 50 feet wide, and usually have sidewalks and alleys. This area is essentially the 19th and early 20th century grid street neighborhoods, mostly located south of I-640.

B. City’s Urban Growth Area or County Planned Growth Area where neighborhood or community mixed use development is identified (see Mixed Use and Special Districts sections)

C. Areas should be zoned RN-1, RN-2, RN-3, or RN-4.
COMMERCIAL AND OFFICE CLASSIFICATIONS

The intent of these classes is to:

- Ensure an adequate supply of suitable land for present and future economic development needs
- Provide for efficient and harmonious distribution of commercial, office, and industrial development
- Develop a variety of commercial areas to meet neighborhood, community and regional needs
- Locate commercial activities on sites which are physically suited, accessible, adequately served by utilities, and will result in compatible land use relationships
- Locate commercial areas based on their composition, scale, and intensity
- Where possible, concentrate new commercial activities in planned development centers to provide maximum benefit to users
- Minimize adverse effects on land use patterns and transportation systems.

GENERAL COMMERCIAL (GC)

This class provides locations for retail, service commercial, and a limited range of wholesale and warehousing activities, and is generally intended to provide a full range of goods and services at the community or regional scale.

A. Commercial sites should be relatively flat, regular in shape, and of sufficient size.

B. Locate commercial activities on arterial and collector streets; however, their placement should not significantly reduce the proper functioning of the transportation system.

C. Commercial sites should be easily served by utilities and other support services.

D. Commercial sites should be compatible with adjacent land uses. Use of transitional land use classes such as HDR, MDR, MDR/O, and O should be considered as a buffer between GC and residential uses to create more harmonious relationships and increase compatibility.

E. Control linear commercial development to prevent traffic congestion and commercial encroachment into residential areas.
1. New linear development should be permitted only on arterials where it is compatible with road design and adjacent land use.

2. Redesign existing linear development to improve its functioning, especially in coordination with street improvements.

3. Only commercial uses requiring high accessibility or otherwise unsuited to “cluster” type development should be allowed to locate in a linear fashion.

F. Areas designated for general commercial (GC) use should be zoned O, OP, C-G, C-H, or C-R.

NEIGHBORHOOD COMMERCIAL (NC)
This class provides locations for a narrow range of convenience retail, service, and office uses that are intended to serve the needs of residential areas within a 1/2-mile radius.

A. Locate neighborhood commercial development on arterial and collector streets on sites that result in minimal negative impacts on adjacent properties.

1. Limit the size of neighborhood commercial areas to 5 acres or less, depending on site characteristics.

2. New neighborhood commercial should not be developed within 1/2 mile of existing commercial development.

3. Ideally, convenience stores should be located in association with other neighborhood serving uses to form neighborhood centers. Convenience stores may be allowed to locate as isolated commercial uses in low density urban areas on collector or arterial streets.

a. Design standards have been developed to ensure that isolated commercial uses complement the surrounding environment.

B. Areas designated for Neighborhood Commercial (NC) use should be zoned C-N.

COMMUNITY COMMERCIAL (CC)
This land use includes retail and service-oriented development, including shops, restaurants and “big box” retail stores. Typical service area includes 20,000 to 30,000 residents.
A. Locate at intersection of arterial streets.

B. Sites should be relatively flat (under 10 percent slope) and with enough depth to support shopping center and ancillary development.

C. Vehicular and pedestrian connections should be accommodated between different components of the district. (e.g. between stores, parking areas and out-parcel development)

D. Infrastructure should include adequate water and sewer services, and major arterial highway access

E. Develop community-serving commercial areas providing a wide range of goods and services to accommodate the majority of consumer needs within major geographic sectors of the community.

   1. Locate community-serving commercial development on major collector and arterial streets, on sites which allow for the clustering of activities and result in minimal negative impacts on adjacent properties or the transportation system.

   2. Control the formation of new community-serving commercial areas to ensure the balanced distribution of commercial services throughout the metropolitan area.

F. Areas designated Community Commercial (CC) should be zoned O, C-N, C-G, or C-H.

**REGIONAL COMMERCIAL (RC)**

This land use includes retail and service-oriented development that is located within a mall, large plazas, “life style centers” or “big box” retail stores that serve the region.

A. Locate at intersection of arterial streets.

B. Sites should be relatively flat (under 10 percent slope) and with enough depth to support shopping center and ancillary development.

C. Vehicular and pedestrian connections should be accommodated between different components of the district (e.g. between stores, parking areas and out-parcel development).

D. Infrastructure should include adequate water and sewer services and major highway access.
E. Develop region-serving commercial areas providing a full range of goods and services designed to accommodate regional markets.

1. Locate region-serving commercial development on arterials in locations which are easily accessible to the interstate system. Development sites should be sufficient in size to permit future expansion.

2. Regional commercial development should be limited and carefully located to avoid market over-saturation and conflict with the central business district.

F. Areas designated Regional Commercial (RS) should be zoned OP, C-H-C-R, or I-MU.

**OFFICE (O)**

This class is primarily intended for business and professional offices and office parks. In some cases, areas suitable for office development may also be deemed suitable for medium density residential uses.

A. The majority of office needs outside the inner city should be accommodated in office parks along major thoroughfares and as transitional uses between residential and more intensive land uses.

   1. Locate office parks on major collector and arterial streets adjacent to or in close proximity to development centers.

B. Integrate office uses with commercial uses in the design of major development centers.

C. Low intensity office uses may be permitted as a transitional use adjacent to Community and Neighborhood Commercial areas.

D. Locate high intensity office complexes within the central business district or within close proximity to arterial freeway exchanges or be served by transit.

E. Areas designated for office (O) use should be zoned O or OP.

**MEDIUM DENSITY RESIDENTIAL/OFFICE (MDR/O):**

Office and medium density residential uses typically have similar development characteristics: scale of building, areas devoted to parking, yard spaces, and location requirements (along thoroughfares).
Either use is acceptable in this designation. These uses provide a buffer to low density residential areas, particularly when located adjacent to a thoroughfare or as a transition between commercial and residential uses.

A. The same locational criteria apply as in Medium Density Residential (MDR).

B. Areas designated Medium Density Residential/Office (MDR/O) should be zoned RN-2, RN-3, RN-4, RN-5, RN-6, or O.

**TECHNOLOGY PARK (TP)**

This land use primarily includes offices and research and development facilities. The target area for such development has been the Pellissippi Technology Corridor. Additional districts could be created in other areas of the city or county. The development standards that are adopted by the Tennessee Technology Corridor Development Authority should be used for such districts.

A. Areas designated Technology Park should be located on sites:

1. Within the Technology Corridor or subsequent areas designated for Technology Park development.

2. Near freeway interchanges or along major arterials

3. Able to be served with sanitary sewer, water and natural gas

B. Areas designated for Technology Park (TP) use should be zoned OP or I-RD.
INDUSTRIAL AND EMPLOYMENT CENTER CLASSIFICATIONS

These classes are intended for the manufacturing, assembling, fabrication, and warehousing of goods. Light and heavy industrial classes are distinguished by the range of permitted uses and their potential for resulting in adverse off-site impacts.

LIGHT INDUSTRIAL (LI)

Typically consists of older industrial areas used for the light manufacturing, assembling, warehousing and distribution of goods. Light industrial uses include such manufacturing as assembly of electronic goods and packaging of beverage or food products. Substantial landscaped buffers are expected between uses of lesser intensity, particularly residential, office and agricultural uses.

A. Locate industrial development on sites in existing industrial areas within one mile of an interstate interchange with access via arterial or major collector streets.

B. Areas designated for LI (Light Industrial) use should be zoned I-MU, I-RD, or I-G.

HEAVY INDUSTRIAL (HI)

Typically consists of older industrial areas used for the heavy manufacturing and assembling of goods. Heavy industrial uses include processes used in the production of steel, automobiles, chemicals, cement, and animal by-products and are viewed as clearly not compatible with areas designated for residential, institutional, office and retail uses. Substantial landscaped buffers are expected between uses of lesser intensity, particularly residential, office and agricultural uses.

A. Locate industrial development on sites in existing industrial areas within one mile of an interstate interchange with access via arterial or major collector streets.

B. Locate industrial development on sites which are:

1. relatively flat and require minimal physical alteration;

2. large enough to accommodate buildings, building setbacks, and parking lots;

3. regular in shape and sufficiently large for the proposed activity;
4. accessible to the arterial roads and, where appropriate, to rail lines;

5. not accessible by residential streets;

6. served or can be served adequately by utilities;

7. developable in a manner compatible with adjacent existing or proposed land uses

8. served by power, water, and waste disposal facilities.

C. Locate new industrial development primarily in industrial parks or other suitably planned industrial settings of ten acres or greater.

D. New industrial development outside of industrial parks or planned settings should occur only within existing zoning or adjacent to existing industrial areas.

E. Industries having minimal off-site impacts may be permitted in non-retail commercial centers.

F. Promote the development of small-scale planned industrial parks in the city.

1. Locate industrial parks where there will be no significant adverse impacts on areas designated for residential use.

2. Encourage occupancy by firms which expand employment opportunities for low- and moderate-income persons.

G. Provide incentives for the redevelopment and rehabilitation of existing industrial buildings and areas within the city.

H. Areas designated for Heavy Industrial use (HI) should be zoned I-H or I-G.

**MINING (M)**

Quarry operations and asphalt plants are a particular form of heavy industrial and are generally located in rural areas. Substantial landscaped buffers are expected between uses of lesser intensity, particularly residential, office and agricultural uses.
A. Locate mining operations on sites in existing industrial areas within one mile of an interstate interchange with access via arterial or major collector streets.

B. Areas designated for M (Mining) use should be zoned I-H.

**BUSINESS PARK TYPE 1 (BP-1)**

Primary uses are light manufacturing, office and regionally-oriented warehouse/distribution services in which tractor-trailer transportation is to be a substantial portion of the operations. Permitted zones will require site plan review, which shall address landscaping, lighting, signs, drainage and other development concerns. Substantial landscaped buffers are expected adjacent to uses of lesser intensity, particularly residential, office and agricultural uses.

A. Relatively flat sites (predominant slopes less than 6 percent) out of floodplains.

B. Relatively large sites (generally over 100 acres).

C. Away from low and medium density areas or where truck traffic would have to go through such areas.

D. Areas with freeway and arterial highway access (generally within two miles of an interchange).

E. Rail access is a consideration.

F. Can be served with sanitary sewer, water and natural gas.

G. Areas designated Business Park Type 1 (BP-1) should be zoned OP, I-MU, or I-RD.

**BUSINESS PARK TYPE 2 (BP-2)**

Large-scale research and development facilities, office developments, and office parks/campuses. May include accessory services for employees such as personal services and restaurants. Site plans must include provisions for landscaping, lighting and signs. Substantial landscaped buffers are necessary between uses of lesser intensity, particularly residential, office and agricultural uses.

A. Relatively flat sites (predominant slopes less than 6 percent) out of floodplains.

B. Relatively large sites (generally over 100 acres).
C. Away from low and medium density areas or where truck traffic would have to go through such areas.

D. Areas with freeway and arterial highway access (generally within two miles of an interchange).

E. Rail access is a consideration.

F. Can be served with sanitary sewer, water and natural gas.

G. Areas designated Business Park Type 1 (BP-1) should be zoned OP or I-RD.

CIVIC/INSTITUTIONAL, PARKS, AND OPEN SPACE CLASSIFICATIONS

- Provide for areas for recreation, civic engagement, education, health and social services and other public and quasi-public entities serving to provide civic uses
- Ensure consideration is given to public sites for proposed change to the adopted plan
- Identify public sites which may affect or be affected by other land uses in the vicinity
- Protect the public investment in the site from encroachment of incompatible activities

For public and institutional land uses, various zonings are appropriate, depending on what district is needed to permit the use. If any of these properties are to be developed for private purposes, any rezoning proposal will require a one year plan amendment to the appropriate land use classification.

The policies listed below should be followed in making decisions concerning the expansion, relocation and development of new publicly or privately owned institutional uses.

CIVIC/INSTITUTIONAL (CI) – GENERAL

This land use classification consists of land used for major public and quasi-public institutions, including schools, colleges, the university, churches, correctional facilities, hospitals, utilities and similar uses.

A. Locate Civic/Institutional uses on land which consists of:

1. Existing public uses other than parks and greenways
2. Quasi-public uses of two acres or more
B. Areas designated Civic/Institutional (CI) should be zoned INST.

**PUBLIC PARKS AND REFUGES (PP)**

This land use classification contains existing parks, wildlife refuges or similar public or quasi-public (owned by civic or related organizations) parks, open spaces and greenways.

A. Location criteria is not needed relative to large components of the park system, like community, district, and regional parks and refuges – these areas are generally established through capital expenditures of land transfers from state or federal governments. More detailed criteria is discussed relative to the type of park later in this chapter.

B. Areas designated Public Parks and Refuges (PP) should be zoned OS or NA.

**OTHER OPEN SPACE (OS)**

Primary uses in this designation are cemeteries, private golf courses and other similar uses or areas possessing either topographical or environmental features that would limit intensive development. Open space areas should serve as buffers or conservation and recreation areas.

A. Areas designated as Open Space should be zoned AG, OS, or NA.

**WATER (W)**

These are areas designated to protect river and creek channels and flood plains from development that would appreciably increase flood heights and flood damage.

A. This designation is located along the French Broad River, Holston River, Tennessee River (Fort Loudoun Lake), and Clinch River (Melton Hill Lake)

B. Generally, no structures or uses should be permitted within the floodway that would alter a stream’s character and ability to carry floodwaters. All proposed uses and structures are subject to the approval of the City Engineering Department

C. All areas designated as Floodway should be in the F overlay zone in the City of Knoxville.

**RIGHTS OF WAY (ROW)**

Generally, these areas are the rights of way of interstates, railways, airports, very wide parkways and major arterial highways.
A. Areas designated Rights-of-Way (ROW) may be zoned any zone as appropriate in the City of Knoxville.

**HILLSIDE PROTECTION (HP)**

This classification is used to identify hillsides, ridges and similar features that have a slope of 15 percent or more. Open space, recreation land or very low density housing (one dwelling unit per two acres) is recommended for slopes exceeding 25 percent. For slopes of 15 to 25 percent, housing densities should not exceed 2 du/ac). Office uses may also be considered. Building height should not exceed 35 feet.

A. Areas designated Hillside Protection on the Hillside and Ridgetop Protection Plan should be in the HP overlay zone in the City of Knoxville.

**STREAM PROTECTION (SP)**

Typically, these are areas which are subject to flooding.

A. Such areas include areas designated by FEMA as the floodway, which carries the significant portion of stormwater, and the 500-year flood fringe, which the city and county govern with various stormwater regulations.

B. Areas designated Stream Protection may be in any zone as appropriate in the City of Knoxville.

**MIXED USE CLASSIFICATIONS**

**MIXED USE NEIGHBORHOOD CENTER (MU-NC)**

Medium density mixed use development with housing densities 6 to 12 dwelling units per acre. The center should be served by sidewalks, transit, and be located along a local street or thoroughfare.

A. Areas designated MU-NC should be located on sites which:

1. Are relatively flat (slopes generally less than 10 percent)

2. Are currently served by or planned to be served by sidewalks
3. Do not include auto or truck oriented uses, industrial, strip commercial or warehouse/distribution uses, unless the proposal calls for a redevelopment of such areas

4. Are located at intersections of local streets and thoroughfares

5. Are located adjacent to low or medium density residential uses

B. Areas designated Mixed Use Neighborhood Center may be zoned O or C-N.

MIXED USE COMMUNITY CENTER (MU-CC)

These centers are envisioned to be developed at a moderate intensity with a variety of housing types. The core of the district, with its predominant commercial and office uses, should be within ¼ mile of the higher intensity residential uses (such as townhouses and apartments). The district should be located within a ¼-mile radius of an intersection of the thoroughfare system (a collector/arterial or arterial/arterial intersection). In addition to sidewalks, the district should be served by transit. Redevelopment of vacant or largely vacant shopping centers are considerations for these centers.

A. Includes high-density mixed-use development with housing densities 6 to 24 dwelling units per acre. The center should be served by sidewalks, transit, and be located along a major arterial or highway interstate.

B. Areas designated MU-CC should be on sites which:

1. Are relatively flat (slopes generally less than 10 percent)

2. Are currently served by or planned to be served by sidewalks

3. Do not include auto and truck oriented uses or industrial, strip commercial or warehouse/distribution uses, unless the proposal calls for a redevelopment of such areas

4. Are within ¼ mile radius of an intersection of the thoroughfare system (collector/arterial or arterial/arterial) intersection

C. The commercial/office core of MU-CC areas should be within ¼ mile of higher intensity residential uses (e.g. townhouses and apartments)
D. Areas designated Community Mixed Use Center may be zoned O, C-G, or C-H.

**MIXED USE REGIONAL CENTER (MU-RC)**

These are envisioned to be highest intensity mixed use centers with housing densities over 24 dwelling units per acre. The center should be served by sidewalks, transit, and be located along a major arterial or highway interstate.

A. Areas designated MU-CC should be on sites which:

1. Are relatively flat (slopes generally less than 10 percent)
2. Are currently served by or planned to be served by sidewalks
3. Do not include auto and truck oriented uses or industrial, strip commercial or warehouse/distribution uses, unless the proposal calls for a redevelopment of such areas
4. Are located on a major arterial, adjacent to an Interstate highway or adjacent to downtown.

B. Areas designated as Mixed Use Regional Center (MU-RC) should be zoned OP, C-G, C-H, C-R, or DK.

**MIXED USE URBAN CORRIDOR (MU-UC)**

This land use consists of urban streets that have potential for redevelopment and vertical mixed uses. Commercial cores or nodes should be created along these corridors. Nodes should not be more than 4 blocks.

A. Areas designated MU-UC should be on sites which:

1. Are currently served by or planned to be served by sidewalks
2. Are currently served by or planned to be served by public transit
3. Have streets designed or planned for redesign with street trees, on-street parking, and other streetscape amenities
B. Areas designated as Mixed Use Urban Corridor (MU-UC) should be zoned C-G, C-H, I-MU, DK, SW, or CU in the City of Knoxville.

**SOUTH WATERFRONT MIXED USE DISTRICT I (SWMUD I)**

This district allows a range of development intensities and forms. Subject to regulations of the Knoxville South Waterfront form-based development code, (Knoxville Zoning Ordinance, article 4, Section 27).

A. Areas designated South Waterfront Mixed Use District I should be zoned SW-1 through SW-7, as appropriate and provided for under the Knoxville Zoning Ordinance.

**SOUTH WATERFRONT MIXED USE DISTRICT II (SWMUD II)**

This district allows for diverse uses and range of development intensities and forms. Zoning is limited to districts which require Knoxville-Knox County Planning special use approval.

A. Areas designated South Waterfront Mixed Use District II should be zoned RN-1, RN-2, RN-5, O, C-G, or I-G, as appropriate.

**MIXED USE SPECIAL DISTRICT (MU-SD)**

These can include designations to address urban design, pedestrian- and transit- oriented development and vertical mixed-use in designated areas. The areas may include older portions of the City where redevelopment and/or preservation programs are needed for revitalization purposes. Each designated area on the One Year Plan map will have a reference number to a specific sector plan.

A. Case-by-case analysis is recommended.

B. Areas designated as mixed use–special districts (MU-SD) should be zoned on a case-by-case basis. See corresponding sector plan for appropriate zoning choices as defined by that specific mixed use district.

**LOCATION CRITERIA FOR SPECIFIC USES**

The following section outlines specific policies for different types of civic and institutional uses, such as education, health and social services, cultural facilities, and churches.
DUPLEXES

A. Duplexes may be permitted in low density areas where their development will not significantly affect the service demands or aesthetics of the area. Within areas designated for low density residential use, duplexes should be allowed where one or more of the following conditions exist:

1. The proposed site is located on a collector street.

2. Development of the duplex would provide a desirable buffer between residential and non-residential areas.

3. The site is in an area having a gross density exceeding 5 dwelling units per acre.

4. The site is in an area which has experienced a significant loss of housing but is still desirable for residential use.

5. The site is a part of a planned residential development.

6. Conversion of a detached house into a duplex should be permitted where the structure meets the location criteria listed above and does not require significant variances from the provisions of the zoning ordinance.

B. Duplexes should be encouraged in areas designated as appropriate for medium density housing.

C. Duplexes may be used in some instances as buffers between detached housing areas and more intense non-residential uses.

MANUFACTURED HOMES

A. Within the city, single-wide manufactured homes should be permitted in mobile home parks only. Mobile home parks should be considered a large scale, medium density, multi-dwelling residential use. The location and design of individual parks should depend on the purpose(s) to be served.

1. Locate mobile home parks designed for long-term occupancy in attached multi-dwelling areas near or on major arterials. Emphasis should be placed on site planning, recreation and open space, and facilities to accommodate residents’ needs.
2. Locate mobile home parks designed for short-term or transient occupancy convenient to facilities meeting the needs of a traveling public (e.g., motels, restaurants, filling stations). Site design should allow for ease of ingress and egress.

GROUP HOMES

A. Locate group homes (e.g., rooming and boarding houses and congregate housing) principally within the inner city. They should be within close proximity to shopping and transit service. In the City of Knoxville, residential care facilities must comply with all standards for multi-family dwellings in the district in which they are located, including the standards for design.

EDUCATIONAL FACILITIES

Provide educational facilities at locations convenient to areas of need.

A. Locate nursery schools within or adjacent to residential areas and on sites which are easily and safely accessible to through traffic.

1. Sites should be within or adjacent to residential areas, but at locations that will not adversely affect surrounding properties.

2. Sites should be on collector streets.

B. Locate elementary/primary schools within or adjacent to residential areas and at locations which are easily and safely accessible to local pedestrian and vehicular traffic.

1. Locations should be within walking distance of residential areas (3/4 mile or less, depending on density of development).

2. Sites should be located within or adjacent to residential areas, but at locations that will not adversely impact surrounding properties.

C. Locate junior high/middle schools central to the residential neighborhoods being served and near district and community activity centers. Locations should also be easily and safely accessible to local and through traffic.

1. Locations should be within a 1 1/2-mile radius of the area served, including the service areas of one or more elementary/primary schools.
2. Sites should be located in close proximity to neighborhood and community activity centers and should serve as community activity centers themselves. Locations should not significantly impact or be impacted by adjacent land uses.

3. Sites should be directly accessible to arterial or collector streets.

D. Locate high schools near districts and community activity centers and at locations which are easily and safely accessible.

1. Locations should be within a 2-mile radius of the area being served, including the service areas of one or more junior high/middle schools.

2. Sites should be in close proximity to district and community activity centers and may be located near neighborhood, commercial, and office uses. Facilities should be situated at locations which will not adversely impact or be impacted by adjacent land uses.

3. Sites should be directly accessible to arterial or collector streets.

E. Locate vocational, special, and adult educational facilities on sites which are readily accessible to the areas being served as well as major activity centers.

1. Locations should be on arterial or collector streets with ease of access to arterial streets.

2. Sites should be located near district and community activity centers and may be located adjacent to Neighborhood Commercial and office uses. Facilities should not adversely impact or be impacted by adjacent land uses.

F. Locate public junior colleges, colleges, universities, and similar institutions of higher education near major activity centers and on sites that are easily and safely accessible to through traffic.

1. Sites should have direct access to arterial streets and incorporate an internal circulation system which minimizes impacts on surrounding land uses and traffic patterns. Consideration should also be given to facility expansion at the time of site acquisition.
HEALTH AND SOCIAL SERVICES FACILITIES

A. Provide medical and dental facilities and services at convenient locations for all Knoxville residents.

B. Locate new hospitals and similar major medical facilities on sites which are convenient to the surrounding area, easily and safely accessible to through traffic, and not adversely affected by more intense development.

1. Locations should be on either arterial or major collector streets. Accessibility to interstate highways should be considered.

2. Hospitals should be developed on sites which will allow for adequate facility expansion.

3. More intense development, including heavy commercial and industrial uses, should not be permitted to develop on sites in close proximity to hospitals and major health facilities.

4. Permit expansion of existing hospitals and major health facilities in a manner which will not adversely affect the surrounding existing land use pattern.

5. Hospitals should not be permitted to expand into existing stable residential neighborhoods.

6. Consider the impact of hospital expansion on the surrounding area’s circulation pattern.

C. Permit similar office uses, including medical and dental offices, a related commercial use to develop in close proximity to hospitals and major health facilities.

D. Locate specialized health facilities on sites based on the land use requirements of the facility.

E. Sanitoriums, mental health institutions, and similar facilities may require campus-like settings and should be located in the Urban Area where acreage requirements can be satisfied and where easy and safe access can be provided to other parts of the community.
F. Locate nursing and convalescent homes in close proximity to residential areas, but developed in a manner which will not adversely affect adjacent, less intense uses. Locations on arterial and collector streets should be considered.

G. Locate branch facilities of the Knox County Health Department and similar community health centers relative to areas of need, on sites which are easily and safely accessible to through traffic, and in a manner, which will not adversely affect surrounding properties.
   1. Locations should be on either arterial or collector streets.
   2. Situate sites for community health centers adjacent to or in close proximity to institutional, office, or light commercial uses.

H. Locate civil defense shelters and similar facilities in close proximity to areas of high population densities and arterial or interstate highway access.

CULTURAL FACILITIES

Locate cultural facilities, both public and private, throughout the community at locations accessible to the public.

A. Develop theaters and assembly halls within or in close proximity to development centers in locations which are easily and safely accessible to the surrounding area.

B. Develop libraries within or in close proximity to development centers in locations which are easily and safely accessible to the surrounding area.
   1. Locations should be on arterials and collectors.
   2. Sites should be selected which will not adversely affect any adjacent, less intensive uses. Consideration should be given to sites adjacent to or developed with other institutional uses and compatible office and light commercial uses.

C. Develop museums within or in close proximity to development centers in locations which are easily and safely accessible to through traffic.
   1. Locations should be on arterial streets.
2. Sites should be selected which will not adversely affect any surrounding, less intensive land uses. Consideration should be given to sites adjacent to other institutional uses and compatible office and light commercial uses.

D. Churches: Locate churches throughout the community in close proximity to major residential areas. Consider sites which afford safe and convenient access to both local and through traffic.

1. Churches should be located on arterial and collector streets.

2. Sites which are located to serve one or more residential areas should be selected.
   Development of selected sites should be done in a manner which will not adversely affect any adjacent, less intensive land uses.

PARK FACILITIES

A. Neighborhood parks, squares and commons should be within ¼ mile of residents in the traditional residential areas and within ½ mile of residents within the balance of the city and county’s Planned Growth area.

B. Greenways should be located along or within the flood plains of streams and rivers/reservoirs. Other potential locations include ridges and utility corridors.

C. Areas designated Public Parks and Refuges (PP) should be zoned OS-1 and other zones that allow parks and open space as permitted uses, as appropriate and provided for under the Knoxville Zoning Ordinance.

D. Develop and maintain park and recreational open space at convenient locations throughout Knoxville.

   1. Develop and maintain park and recreation facilities in the community at a scale which reflects their location in either a rural or urban setting.

      a. Parks and recreation facilities should accommodate a wide range of activities and be developed at locations which can adequately serve varying levels of development intensity.
2. Develop mini-parks in areas of Knoxville that are characterized by a medium to high population density.
   
a. Mini-parks should include specialized facilities that serve a concentrated or limited population, or specific group, such as small children, or senior citizens.

b. Mini-parks should be located in apartment or townhouse developments, development centers, or dense, inner city areas. Sites should be served by a pedestrian circulation system connecting with nearby residential areas.

3. Locate neighborhood parks either near or within major residential areas which may be characterized by a variety of densities.
   
a. Neighborhood parks should be areas of intense recreational activity, with facilities designated for field and court games, hobbies and crafts, and free play.

b. Locations should be near elementary schools and on collector streets. Sites should be served by a pedestrian circulation system connecting with nearby residential areas.

c. Area served should be within 3/4 mile of the park.

d. The physical characteristics of each site should be suited to the intensity development.

4. Locate community parks in close proximity to several residential areas which may be characterized by a variety of housing types and densities.
   
a. Community parks should be areas of intense recreational activity, with facilities designated for field and court games, indoor activities, swimming, and possibly neighborhood activities.

b. Locations should be in close proximity to junior and senior high schools and other public facilities, and on collector streets with easy access to arterials. Sites should be served by a pedestrian circulation system connecting with nearby residential areas.

c. Area served should be within a 1/2 to 3 mile radius.
d. Sites should be suited to intense development.

5. Locate district parks to serve several residential areas on sites that are characterized by some unique or interesting natural feature such as a lake or scenic vista.

   a. Parks should include an area of natural or ornamental quality for passive and active outdoor recreational activities, such as walking, hiking, horseback riding, picnicking, field and court games, and possibly camping.

   b. Locations should be where natural resources are available and in close proximity to several communities.

   c. Area served should be within 15 minutes driving time from the facility.

   d. Sites should include some physiographic feature of natural interest.

   e. Sites should be located on either arterials or major collectors.

   f. Recreational activities should be compatible with the natural resources, conserving their unique qualities.

6. Locate regional parks to serve all of the residents of Knoxville through their participation in passive and active nature-oriented outdoor recreational activities.

   a. Parks should include an area of natural quality for such activities as viewing and studying nature, wildlife habitats, and conservation. Other activities include swimming, camping, hiking, fishing, and horseback riding.

   b. Locations should be where unique or interesting natural resources are present, particularly water (e.g., woodlands, scenic vistas).

   c. Sites should be characterized by natural settings, contiguous to water, where possible.

   d. Sites should be located on arterials.

   e. Recreational activities should be compatible with the natural resources, conserving their unique qualities.
**PROPOSED LAND USE MAP**

The One Year Plan land use map serves as a guide for making zoning decisions.

The One Year Plan map is a future land use map. It is a tool for looking at the future land use of the City and is used in making determinations on rezoning requests.

**MAP LEGEND FOR PROPOSED LAND USE**

The map legend contains the integrated land use categories found in both the sector and the One Year Plans. After the adoption of this plan, any amendments to the land use map will be maintained online at kgis.org. Additional information about the land use categories can be found in Chapter 2 of this document.

CHAPTER 3

STAFF-PROPOSED LAND USE AMENDMENTS

The maps on the following pages include recommended amendments by staff to bring portions of the One Year Plan into conformity with the Sector Plans.

Two properties were annexed in 2019. Since these properties were previously in the County, they will require amendments to be given land use designations in the One Year Plan.

STAFF AMENDMENTS RESULTING FROM IDENTIFIED CONFLICTS

Conflicts between the One Year Plan and the various sector plans exist in places where the One Year Plan has already been updated. Due to the difference between the update schedules of sector plans (updated every 5-6 years) and the One Year Plan (updated annually), there are instances where sector plans need to be amended to coincide with the One Year Plan designation.

Still other conflicts between the two plan types occur when a sector plan gets updated, either through an amendment or through the sector plan’s scheduled update. The One Year Plan must then be updated to accurately reflect the changes made to the sector plan.

The conflicts identified for the 2020 One Year Plan update are listed in the following Staff Amendments 2020 Table.

CHAPTER 4
IDENTIFIED CONFLICTS
AND POTENTIAL GENERAL REZONINGS

City-wide there are 1,216 conflicts or 4,250 acres where the One Year Plan’s proposed land use map conflicts with the current zoning patterns.

Ideally, the land uses contained in the sector and One Year Plan maps should complement the zoning map in order to achieve the City’s long-term goals and objectives. With the zoning update this past year, several new conflicts have arisen. Most of these are from parcels for which the zoning was updated to reflect current development and fix nonconforming uses. Now that the zoning map has been corrected, the sector and One Year Plan maps need to be updated to reflect these changes, which will require plan amendments.

The following six maps illustrate where these conflicts occur. The maps and more detail about the One-Year Plan can be found at knoxplanning.org.

</tr>
<tr>
<td>------------------------</td>
<td>-------------</td>
<td>------------------</td>
<td>----------------------------------------</td>
<td>------------------------------</td>
</tr>
<tr>
<td>Medium Density Residential / Office (MDR/O)</td>
<td>Office and medium residential uses typically have similar development characteristics: scale of buildings, areas devoted to parking, yard spaces and location requirements (on arterials/collectors). These uses provide a buffer to low density residential areas, particularly when located adjacent to an arterial/collector or as a transition between commercial uses and a neighborhood.</td>
<td>Near community activity centers, including uses such as schools and colleges, parks, and community commercial/office nodes. As transitional areas between commercial development and low density residential neighborhoods. Site with less than 15 percent slopes. Along or near corridors that are served by or proposed to be served by transit, with densities proposed to be above 12 dwelling units per acre and to be served by sidewalks.</td>
<td>City of Knoxville Zones: RN-3, RN-4, RN-5, RN-6, O. Knox County Rural Area: N/A. Knox County Planned Growth Boundary (PGB): OB, PR 6 to 12 du/ac. Knox County Urban Growth Boundary (UGB): OB, PR 6 to 12 du/ac.</td>
<td>City of Knoxville Zones: RN-3, RN-4, RN-5, RN-6, O.</td>
</tr>
<tr>
<td>Office (O)</td>
<td>This land use includes business and professional offices and office parks.</td>
<td>Low intensity business and professional offices (less than three stories) may be transitional uses from commercial or industrial uses to neighborhoods. Generally level sites (slopes less than 15 percent). Access to major collector or arterial streets, particularly within one-quarter mile of such thoroughfares. Highest intensity office uses (development that is four or more stories), should be located in close proximity to arterial/freeway interchanges or to be served by transit.</td>
<td>City of Knoxville Zones: O, OP. Knox County Rural Area: N/A. Knox County Planned Growth Boundary (PGB): OA, OB, OC, PC (with covenants). Knox County Urban Growth Boundary (UGB): OA, OB, OC, PC (with covenants).</td>
<td>City of Knoxville Zones: O, OP.</td>
</tr>
<tr>
<td>Technology Park (TP)</td>
<td>This land use primarily includes offices and research and development facilities. The target area for such development has been the Pellissippi Technology Corridor. Additional districts could be created in other areas of the city or county. The development standards that are adopted by the Tennessee Technology Corridor Development Authority should be used for such districts.</td>
<td>Within the Technology Corridor or subsequent areas designated for Technology Park development. Sites near freeway interchanges or along major arterials. Water, sewer and natural gas utilities available.</td>
<td>City of Knoxville Zones: OP, I-RD. Knox County Rural Area: N/A. Knox County Planned Growth Boundary (PGB): BP and PC (with covenants limiting uses to research/development), EC (with covenants limiting uses to office and research/development). Knox County Urban Growth Boundary (UGB): BP and PC (with covenants limiting uses to research/development), EC (with covenants limiting uses to office and research/development).</td>
